🔗 Portfolio

Summary

I am Erica Therese Dominguez, a fresh graduate of Bachelor of Science in Information Technology with Specialization in Web Development from De La Salle University Dasmariñas. I aspire to excel as a web and software developer or engineer, bringing a strong academic foundation and proven practical experience in technologies including C#, ASP.NET, and MSSQL, complemented by proficiency in modern frameworks like React and Next.js, along with hands-on skill and passion for UI/UX designing.

Technical Skills

Programming Languages
C#, Java, JavaScript, TypeScript

Frontend / Client-Side
React, Next.js, Electron, HTML, CSS, Tailwind CSS, Bootstrap, jQuery

Backend / Server-Side
ASP.NET, Node.js, Express.js

Mobile Application
React Native, Flutter

Data & Cloud Services
MongoDB, Microsoft SQL Server, Firebase

Development Tools & IDEs
Visual Studio Code, Visual Studio 2022, Cursor AI

Workflow & Collaboration
Git, GitHub, BitBucket, Jira, Microsoft Teams

Design & Multimedia
Figma, Canva, Adobe Photoshop, Illustrator, After Effects

Education

Bachelor of Science in Information Technology with Specialization in Web Development
🎓 De La Salle University-Dasmariñas   📅 2021 - 2025

- Dean's List First Honor Awardee
  - 1st & 2nd Semester (A.Y. 2021-2022)
  - 1st Semester (A.Y. 2022-2023)
  - 2nd Semester (A.Y. 2023-2024)
  - 2nd Semester (A.Y. 2024-2025)

Experience

Frontend Developer Trainee
🏢 Edufied Pte Ltd   📅 January - April 2025

- Built and implemented user interface features for FilPass Version 2, directly translating designs from Figma using Next.js, TypeScript, and Tailwind CSS.
- Worked closely with the frontend team to divide tasks and helped resolve technical issues like merge conflicts and build errors to keep deployment running smoothly.
- Fixed critical issues reported by QA (Quality Assurance), including implementing error checking and ensuring all design details (spacing, fonts, and colors) perfectly matched the Figma documents.
- Refactored existing code to make it cleaner and easier for the team to maintain. Focused on making common functions reusable across different parts of the application.
- Assisted in onboarding new interns by guiding them through the code, answering questions, and giving them tasks with clear instructions.
- Communicated progress daily to the entire team, including the CEO, through MS Teams and presented updates during daily team meetings and peer review sessions.

Capstone Project

Book with DDC: A Web-based Appointment Management System for Dominguez Dental Clinic
🗂 C#, ASP.NET MVC, JavaScript, MSSQL

This full-stack system was developed to resolve challenges in manual scheduling and patient record management for my family's dental clinic. As the team lead for this capstone project, I contributed significantly to all stages of development. Using ASP.NET MVC and Microsoft SQL Server (MSSQL), I was responsible for the full-stack development, including planning the user flow, creating the UI/UX design, and coding both the front end and back end. My role also involved database management, extensive debugging, testing, and deployment. For a video presentation of the user flow, please visit this Google Drive link.

Please see more of my academic & personal projects in my portfolio.
